Summary

Software and Platform Engineer with 8+ years of professional experience delivering cloud platforms, deployment automation, and production services across AWS and Kubernetes. I also build independent web, desktop, and Android applications using React, Next.js, TypeScript, Firebase, Electron, Tauri, Rust, Kotlin, and Jetpack Compose. Experienced across product features and user workflows, cloud integrations, infrastructure as code, CI/CD, and release delivery.

Work Experience

Platform / DevOps Engineer June 2023 – Present

Flutter UK & Ireland (Sky Betting & Gaming) | Leeds, UK

- Manage, deploy, and maintain multi-cluster AWS EKS infrastructure and CI/CD pipelines (Jenkins, GoCD, Concourse, GitHub Actions) supporting high-traffic Free to Play betting and gaming products.
- Executed multi-version in-place upgrades of production EKS clusters from v1.26 through v1.31; audited VPC CNI, CoreDNS, kube-proxy, EBS CSI, and Cluster Autoscaler compatibility with zero customer downtime.
- Migrated production worker node fleets from legacy EC2 Launch Configurations to Launch Templates on Amazon Linux 2023 with zero service disruption.
- Deployed and maintained EKS observability using Helm, Terraform, Prometheus, Grafana, and Alertmanager; participate in the out-of-hours on-call rota (PagerDuty, JIRA).
- Migrated platform tooling including Chef to Cinc, AWS WAF to Cloudflare WAF, and Concourse CI pipelines to GitHub Actions.
- Configured Amazon RDS and resolved network dependencies, including NLB-to-RDS connectivity through VPC Endpoint Services.
- Built Lambda functions to monitor RDS endpoints and update NLB target groups, and to update S3 policies using CloudFront IP ranges.
- Designed AWS CDK custom resources and Lambda automation to provision least-privilege MySQL users and store credentials in AWS Secrets Manager.
- Implemented secure pod access with IRSA and External Secrets Operator, replacing Vault and Kube2IAM integrations.
- Created and maintained Docker base images and centralized image repositories for product engineering squads.
- Evaluated an internal AI agent toolkit and reviewed its telemetry and supply-chain dependencies before rollout.

DevOps Engineer April 2021 – May 2023

IBM | Remote / Hyderabad, India

- Built Python and Jenkins microservice onboarding tools to streamline build job creation and Kubernetes deployments.
- Managed Docker and Kubernetes deployments; authored Dockerfiles, Compose configurations, and Helm charts for CI/CD.
- Automated multi-environment infrastructure and configuration management with Terraform and Ansible Tower.
- Integrated Sonatype and Veracode scanning into pipelines for code quality and vulnerability analysis.
- Used Splunk dashboards for log analysis and proactive incident troubleshooting.
- Automated build and release tasks with Bash/Shell and JSON templates across VSTS and Git pipelines.
- Helped configure Kafka brokers, topics, schema registry, and Kafka Connect for internal projects.
- Supported Agile/Scrum delivery through JIRA, change management, troubleshooting, and DevOps guidance.

DevOps Engineer / Software Engineer November 2016 – March 2021

Tech Mahindra | Hyderabad, India

- Designed Jenkins CI/CD pipelines with Git, Maven, Selenium, and JUnit, reducing software release cycle times by 50%.
- Deployed AWS infrastructure across EC2, VPC, S3, IAM, Route 53, and Lambda; automated provisioning and Auto Scaling with Terraform and CloudFormation.
- Created reusable Jenkins shared libraries and Slack/Microsoft Teams build alerts.
- Built and orchestrated containerized services with Docker, Kubernetes, Docker Swarm, and Compose; automated deployments with Ansible.
- Configured Classic and Application Load Balancers with SSL/TLS certificates for highly available environments.
- Managed server provisioning and configuration with Ansible and Chef.
- Managed Git/GitLab workflows, branching strategies, merges, and developer support.
- Administered JFrog Artifactory and Sonatype Nexus repositories.
- Implemented Istio service mesh for traffic management, canary rollouts, and secure service communication.
- Wrote PowerShell and Linux shell automation for server housekeeping, backups, and health checks.
- Coordinated releases and troubleshooting with development, QA, and operations teams.
- Tracked bugs and sprints in JIRA, documented processes, and provided on-call support.

Technical Skills

Software Development: React, Next.js, TypeScript, JavaScript, Node.js, HTML, CSS, SQL, Python
Data and Integrations: Firebase Authentication, Firestore, Firebase Storage, Cloud Functions, Razorpay, account flows, user-scoped data, search, cart and stock rules, reminders
Desktop and Mobile: Electron, Tauri, Rust, Kotlin, Jetpack Compose, Android, Capacitor
Media and Documents: FFmpeg, HTML Canvas, Media3, PDF generation, LaTeX
Cloud Platforms: AWS (EKS, EC2, VPC, RDS, Lambda, NLB/ALB, CloudFront, S3, IAM/IRSA, Route 53, Secrets Manager, SSM), GCP, Azure
Containers and Platform Engineering: Kubernetes, Docker, Helm, ArgoCD, Argo Rollouts, Istio, ECR, Docker Compose
Infrastructure as Code: Terraform, AWS CDK (TypeScript), Ansible, Ansible Tower, AWS CloudFormation
CI/CD and Automation: Jenkins, GitHub Actions, Concourse CI, GoCD, VSTS, Git, JFrog Artifactory, Nexus, Bash, PowerShell
Observability and Security: Prometheus, Grafana, Alertmanager, Splunk, Zabbix, CloudWatch, PagerDuty, Sonatype, Veracode, Cloudflare WAF, External Secrets Operator

Selected Software and Platform Projects

AI Job Search Studio
Technology: TypeScript, Bun, Swift / WebKit, LaTeX
Desktop workspace that imports PDF, text, and LaTeX resumes; applies evidence-based job matching with separate eligibility, language, and location checks; and compiles application PDFs locally.

Shift Rota Tracker
Technology: Next.js, TypeScript, Firebase, Capacitor
Live shift planner with account and password recovery, per-user Firestore data, weekly, monthly, and list views, shift and leave entries, and reminders; mobile build targets are configured.

Passport Photo Maker
Technology: React, Canvas, Capacitor, Electron
Browser photo and print studio with passport and visa presets, custom sizing, high-resolution cropping, print sheets, collages, frames, resume layouts, and calendar tools; mobile and desktop build paths are configured.

RoomRenter
Technology: React, TypeScript, Firebase, Firestore, Cloud Functions
Room listing and rental management app with public property listings and authenticated administration for properties, tenants, and previous-tenancy records.

SKRALLS Praxis Platform
Technology: HTML, CSS, JavaScript, Firebase, Razorpay
Learning platform with course discovery, enrolment, course access, live cohorts, certificates, learner accounts, and administration; payment integration provisions learner access.

Bandhan Box
Technology: Next.js, React, TypeScript, Firebase
Local storefront with product search, filters, sorting, product pages, and cart checks for quantity, stock, minimum orders, and subtotal; orders connect through WhatsApp.

Thatiflix Converter
Technology: Electron, Node.js, FFmpeg, Shell
Cross-platform desktop utility that bundles FFmpeg for local video remuxing, uses stream-copying to avoid re-encoding, and reports processing progress.

Thatiflix Mobile
Technology: Kotlin, Jetpack Compose, Media3, Firebase
Native Android media app for phones and tablets with categorized libraries, playback, account and cloud-source integrations, cached library state, and watch-progress handling.

Backup Harbor
Technology: Tauri, Rust, TypeScript, age encryption
Desktop utility that scans selected Git repositories for ignored secrets and project instructions, creates passphrase- or recovery-key-protected archives, and verifies file hashes on restore.

EKS Platform Blueprint
Technology: Terraform, ArgoCD, Helm, AWS IRSA
Reusable multi-environment Kubernetes foundation with drift detection, health checks, Amazon Linux 2023 worker templates, least-privilege workload identity, and automated secret synchronization.

Portfolio Website
Technology: React, Framer Motion, Firebase Hosting
Responsive single-page portfolio with data-driven career and project sections, animated navigation, reduced-motion support, and Firebase Hosting / GitHub Pages deployments.

Education

Master of Science in Computer Science | Teesside University, Middlesbrough, UK | January 2021 – January 2023
Bachelor of Technology | Jawaharlal Nehru Technological University, Hyderabad, India | 2012 – 2016
